

# Hydraulic Shovel 6030 cost intelligence report

FY26 | Eq-002 scope | Data as of 2026-06-12

| Validated opportunity | Current opportunities | Top product           | Top plant    |
|-----------------------|-----------------------|-----------------------|--------------|
| USD 18.3M             | 18                    | Hydraulic Shovel 6030 | France Plant |

## AI-grounded executive narrative

### Executive summary

As of 2026-06-12, the Hydraulic Shovel 6030 product view contains 18 current opportunities with USD 18,278,122 in validated potential savings.

### Value concentration

The leading plant is France Plant, the leading product is Hydraulic Shovel 6030, the leading category is Powertrain, and the leading component is Final Drive Motor. These are backend-ranked concentrations, not additive portfolio totals.

### Priority actions

- Final Drive Motor at France Plant: USD 7,035,424 at 69% confidence. High-priority value with a current, validated cost gap.
- Engine Control Module at France Plant: USD 3,705,941 at 74% confidence. Material savings supported by current benchmark evidence.
- Oil Filter Assembly at USA Plant: USD 1,997,698 at 79% confidence. Material savings supported by current benchmark evidence.
- Hydraulic Cylinder at Mexico Plant: USD 651,304 at 85% confidence. High-priority value with a current, validated cost gap.
- Transmission Assembly at Czech Plant: USD 612,500 at 86% confidence. Material savings supported by current benchmark evidence.

### Decisions required

- Hydraulic Shovel 6030: USD 10,282,519 across 9 opportunities.

Route the selected opportunity into the existing investigation workflow before recording a recommendation or decision.

# Portfolio priorities

Backend-ranked measures; AI does not calculate these values.

| Dimension | Leader                | Potential savings | Variance |
|-----------|-----------------------|-------------------|----------|
| Plant     | France Plant          | USD 10.7M         | 139.0%   |
| Product   | Hydraulic Shovel 6030 | USD 18.3M         | 40.8%    |
| Category  | Powertrain            | USD 8.6M          | 39.0%    |
| Component | Final Drive Motor     | USD 7.8M          | 55.4%    |

## Recommended quick wins

| Rank | Opportunity                           | Savings    | Confidence | Why now                                                   |
|------|---------------------------------------|------------|------------|-----------------------------------------------------------|
| 1    | Final Drive Motor at France Plant     | USD 7.0M   | 69%        | High-priority value with a current, validated cost gap.   |
| 2    | Engine Control Module at France Plant | USD 3.7M   | 74%        | Material savings supported by current benchmark evidence. |
| 3    | Oil Filter Assembly at USA Plant      | USD 2.0M   | 79%        | Material savings supported by current benchmark evidence. |
| 4    | Hydraulic Cylinder at Mexico Plant    | USD 651.3K | 85%        | High-priority value with a current, validated cost gap.   |
| 5    | Transmission Assembly at Czech Plant  | USD 612.5K | 86%        | Material savings supported by current benchmark evidence. |

## Leading products

| Product               | Opportunity | Variance | Plants                    |
|-----------------------|-------------|----------|---------------------------|
| Hydraulic Shovel 6030 | USD 18.3M   | 40.8%    | Germany Plant / USA Plant |
