

# Executive cost intelligence report

FY26 | Enterprise scope | Data as of 2026-06-12

| Validated opportunity | Current opportunities | Top product           | Top plant   |
|-----------------------|-----------------------|-----------------------|-------------|
| USD 104.4M            | 128                   | Hydraulic Shovel 6030 | Korea Plant |

## AI-grounded executive narrative

### Executive summary

As of 2026-06-12, the enterprise portfolio contains 128 current opportunities with USD 104,389,820 in validated potential savings.

### Value concentration

The leading plant is Korea Plant, the leading product is Hydraulic Shovel 6030, the leading category is Hydraulics, and the leading component is Final Drive Motor. These are backend-ranked concentrations, not additive portfolio totals.

### Priority actions

- Final Drive Motor at France Plant: USD 7,035,424 at 69% confidence. High-priority value with a current, validated cost gap.
- Alternator at Malaysia Plant: USD 6,189,010 at 82% confidence. Savings are available with a lower immediate decision pressure.
- Engine Control Module at Korea Plant: USD 5,422,873 at 93% confidence. Material savings supported by current benchmark evidence.
- Hydraulic Pump at South Africa Plant: USD 4,537,334 at 87% confidence. Savings are available with a lower immediate decision pressure.
- Hydraulic Pump at Korea Plant: USD 4,429,269 at 87% confidence. High-priority value with a current, validated cost gap.

### Decisions required

- Wheel Loader 994: USD 12,676,625 across 6 opportunities.
- Hydraulic Shovel 6030: USD 10,282,519 across 9 opportunities.
- Hydraulic Shovel 6090 FS: USD 5,305,492 across 6 opportunities.
- Dozer D10: USD 3,006,642 across 3 opportunities.
- Excavator 336: USD 2,169,986 across 4 opportunities.

Route the selected opportunity into the existing investigation workflow before recording a recommendation or decision.

# Portfolio priorities

Backend-ranked measures; AI does not calculate these values.

| Dimension | Leader                | Potential savings | Variance |
|-----------|-----------------------|-------------------|----------|
| Plant     | Korea Plant           | USD 13.1M         | 63.7%    |
| Product   | Hydraulic Shovel 6030 | USD 18.3M         | 40.8%    |
| Category  | Hydraulics            | USD 25.3M         | 51.1%    |
| Component | Final Drive Motor     | USD 7.8M          | 55.4%    |

## Recommended quick wins

| Rank | Opportunity                          | Savings  | Confidence | Why now                                                         |
|------|--------------------------------------|----------|------------|-----------------------------------------------------------------|
| 1    | Final Drive Motor at France Plant    | USD 7.0M | 69%        | High-priority value with a current, validated cost gap.         |
| 2    | Alternator at Malaysia Plant         | USD 6.2M | 82%        | Savings are available with a lower immediate decision pressure. |
| 3    | Engine Control Module at Korea Plant | USD 5.4M | 93%        | Material savings supported by current benchmark evidence.       |
| 4    | Hydraulic Pump at South Africa Plant | USD 4.5M | 87%        | Savings are available with a lower immediate decision pressure. |
| 5    | Hydraulic Pump at Korea Plant        | USD 4.4M | 87%        | High-priority value with a current, validated cost gap.         |

## Leading products

| Product                  | Opportunity | Variance | Plants                     |
|--------------------------|-------------|----------|----------------------------|
| Hydraulic Shovel 6030    | USD 18.3M   | 40.8%    | Germany Plant / USA Plant  |
| Dozer D10                | USD 16.3M   | 82.6%    | Sweden Plant / Italy Plant |
| Wheel Loader 994         | USD 12.7M   | 67.1%    | Turkey Plant / Korea Plant |
| Hydraulic Shovel 6090 FS | USD 12.6M   | 30.3%    | France Plant / Korea Plant |
| Hydraulic Shovel 6060    | USD 10.3M   | 31.5%    | Czech Plant / China Plant  |
| Excavator 336            | USD 6.9M    | 21.6%    | Korea Plant / Canada Plant |
